Cookies

At Debt-Free.org.uk, we make use of cookies. This is so we can ensure that our website works in the most effective and efficient manner. They help us to understand how users access our website so we can develop and improve the design, layout, content and function of the site.

What Are Cookies?

A cookie is a small text file that a website saves on your computer or mobile device when you visit the site. It enables the website to remember your actions and preferences (such as login, language, font size and other display preferences) over a period of time, so you don't have to keep re-entering them whenever you come back to the site or browse from one page to another.

Our cookies on this website are used to simply collect information about how visitors use our website and these types of cookies collect the information in an anonymous form.

If you are uncomfortable with the use of cookies, you can disable cookies on your computer by changing the settings in the preferences or options menu in your browser. You can set your browser to reject or block cookies or to tell you when a website tries to put a cookie on your computer. You can also delete any cookies that are already stored on your computer's hard drive. However, please be aware that if you do delete and block all cookies from our website, parts of the site will not then work. This is because some of the cookies we use are essential for parts of our website to operate. Likewise, you may not be able to use some products and services on other websites without cookies.

To find out more about cookies, including to see what cookies have been set and how to manage and delete them, visit www.allaboutcookies.org.

If you do not wish to accept cookies from our website, please leave this site immediately and then delete and block all cookies from this site.

How Do We Use This Information?

We analyse it to determine what is most useful about our website, to help us identify ways to improve it. We use it to find out things such as the number of visitors to the site, the pages they visited, where they came to the site from, the numbers of downloads of documents from the site, etc. This information is then used to compile general traffic analysis and statistical reports.

We may also use personal data for other purposes, which we would describe to you at the point we collect the information.
